UNIVET PRESENTS SANKIND HAND SANITISER

AL FORMULATION CONTAINING
75% V/V ISOPROPYL ALCOHOL

Order online www.univet.ie/sankind

CREATED BY SCIENTISTS

SanKind Hand Sanitiser has been challenged and proven effective by our expert microbiological team against a broad range of commonly encountered human pathogenic bacteria such as *Staphylococcus Aureus*, *Escherichia Coli*, Fungi's such as *Aspergillus Niger* and *Candida Albicans* and Viruses.

SanKind is a powerful formulation that is based on the **World Health Organisation (WHO)** recommended Biocidal formula containing 75% (v/v) Isopropyl Alcohol.

- Siobhan Crowe QP MPSI MPharm Pg. Clin Pharm BA BAI

FACTS

- ✓ The product's effectiveness has been proven at concentrations up to 1000 times that of which is normally found on the hands using only 1ml of SanKind.
- ✓ Our expertise not only guarantees a safe and efficacious product but is designed to eliminate the threat of bacteria, viruses and fungi to those closest to you.
- ✓ The addition of moisturising agents alongside its neutral pH enables a more comfortable and kind experience on the hands.
- ✓ Complaint to the following European Standards: EN14476, EN1276, EN1650, EN1500, EN13727 and EN13624.

Quick Drying Formula

Sankind gives a comfortable and kind experience on the hands this is achieved by using moisturising agents alongside its neutral pH.

Sankind is suitable for all ages.

How to use SanKind Hand Sanitiser

Our expertise not only guarantees a safe and efficacious product but is designed to eliminate the threat of bacteria, viruses and fungi to those closest to you; without the harshness of the traditional formulas. The following diagram demonstrates the recommended way to apply Sankind.

1 Place a small amount of SanKind onto dry hands

2 Spread in the direction from the finger tips

4 Pay particular attention to the finger nails and area between the fingers. Leave in contact for at least 15 seconds.

3 Over the palms and back of the hands

Average drying time for Sankind is 15 seconds, in line with WHO recommendation for contact time for hand sanitiser. SanKind our clinically tested formulation offered by our family to protect yours!
